The screenshot shows a video conference interface. On the left, a slide titled "7 steps of a successful protocol" is displayed. The steps are:

1. Identify topic, question and objectives.
2. Outline a one page concept paper.
3. Prepare Summary tables.
4. Write draft protocol.
5. Prepare Informed consent and annexes.
6. Submit to peer review.
7. Seek ethics committee approval.

The slide also includes the text "BASIC COURSE IN BIO-MEDICAL RESEARCH" and the logo of "IITM NIE". A small video window shows a man speaking. The main video window shows a man in a blue shirt speaking against a green background.

The screenshot shows a video conference interface. On the left, a small video window shows a man speaking. The main video window shows a man in a pink shirt speaking. On the right, a chat window is visible with the following text:

Dear Dr. [Name],
The study on the management of acute myocardial infarction has been mentioned with lack of evidence on the effectiveness of the study. The current study gives an idea about effectiveness of a management of acute myocardial infarction.
Help us to know the effectiveness of the study. The study on the management of acute myocardial infarction has been mentioned.

Dr. [Name] is speaking.

		Patients with breast cancer (as confirmed on endoscopy)		Positive predictive value = $\frac{TP}{TP + FP}$ = $\frac{20}{20 + 180}$ = 10%
		Condition positive	Condition negative	
Fecal occult blood screen test outcome	Test outcome positive	True positive (TP) = 20	False positive (FP) = 180	
	Test outcome negative	False negative (FN) = 10	True negative (TN) = 1820	Negative predictive value = $\frac{TN}{TN + FN}$ = $\frac{1820}{1820 + 10}$ = 99.5%
Sensitivity = $\frac{TP}{TP + FN}$ = $\frac{20}{20 + 10}$ = 67%		Specificity = $\frac{TN}{TN + FP}$ = $\frac{1820}{1820 + 180}$ = 91%

Details of Pretest and Posttest Evaluation:

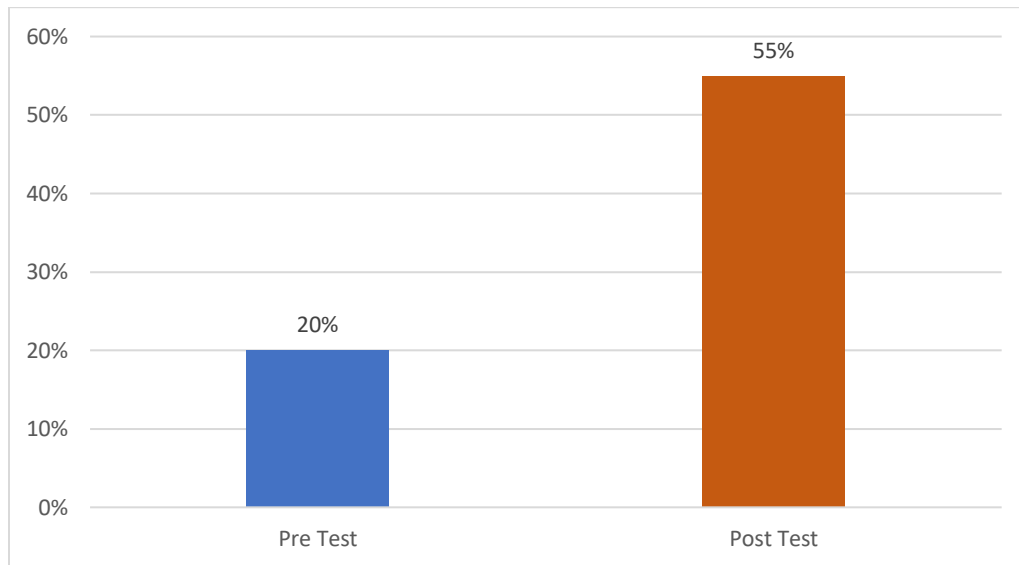

The above bar chart represents the Pre-test and Post-test correct answers given by the participants for the following question: Making estimate about dependent variable from the independent variable for values beyond the observed range of independent variable is:

It was observed that 40% in Pretest answered correctly. In Posttest 60% answered correctly.

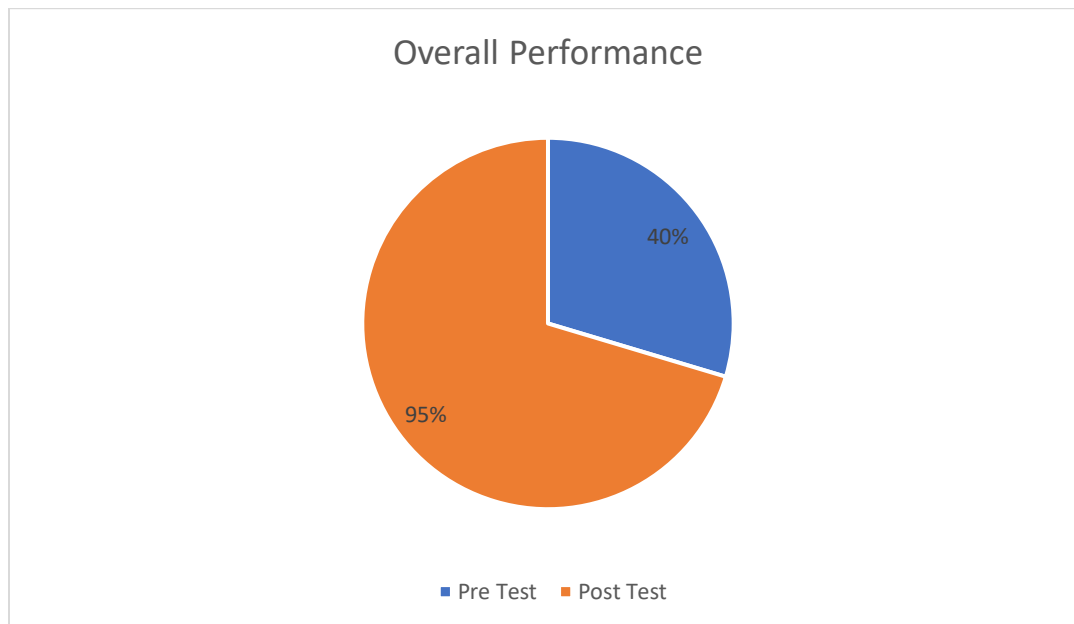

The above bar chart represents the Pre-test and Post-test correct answers given by the participants for the following question: The drawback/s of the open ended question is/are?

It was observed that 32% in Pre test answered correctly. In Post test 62% answered correctly.

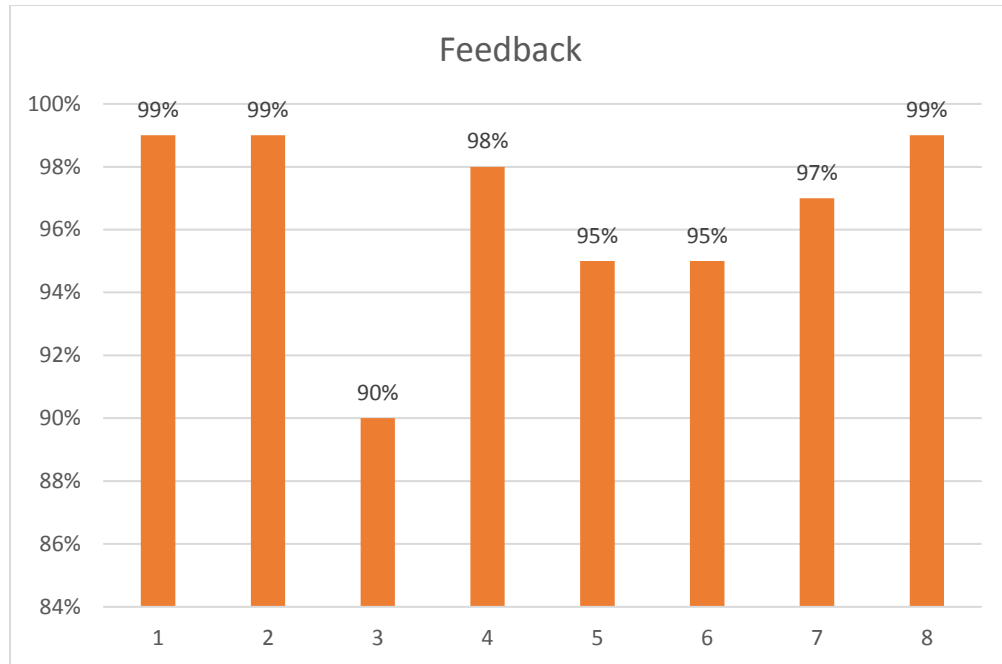

The above bar chart represents the Pre-test and Post-test correct answers given by the participants for the following question: Ability of a test to detect a disease in those who have it is?

It was observed that 20% in Pre test answered correctly. In Post test 55% answered correctly.

The Pie-diagram represents the Pre-test and Post-test overall performance of the participants.

It shows that 40% of the Participants answered correctly in pre-test exam and 95% of the participants answered correctly in Post-test exam.

CONSIDERATIONS:

- 1) Research Methodology workshop should be conducted every year for the benefits of Post Graduate students and faculty members.
- 2) Most of the participants agreed that there should be a full day hands on workshop on Data analysis and Literature search.
